

Graphics Designer | 3D Designer | Signage Estimator

A portrait of a man with dark, wavy hair and a beard, wearing a maroon blazer over a white shirt. He is looking directly at the camera with a slight smile. The background is a plain, light-colored wall.

To obtain a Creative design position where I can expand my knowledge and experience as well as use my outstanding education in graphic design.

Technical Designer with a minimalist and refined visual approach, translating creative concepts into precise, functional designs. Experienced in leading the technical development of brand assets, signage systems, and environmental graphics with clarity and purpose. With over five years of expertise in design for print, digital, and spatial applications, I deliver accurate, production-ready solutions that balance aesthetics and technical requirements. Known for a dynamic attitude and a passion for crafting customised, impactful outcomes that exceed client expectations.

- Post Graduate Diploma in Multimedia and Animation (PGDMA)
- Plus Two (Kerala State syllabus, India)
- SSLC (Kerala State syllabus, India)

As a skilled Graphics Designer, 3D Designer, and Signage Estimator in the fast-evolving advertising industry, I combine technical precision with creative innovation to deliver impactful and cost-effective solutions. With expertise in design principles, 3D modeling, and accurate signage cost estimation, I specialize in creating sophisticated brand identities, photorealistic 3D visuals, and comprehensive cost forecasts that bring client visions to life. Utilizing advanced software such as Adobe Creative Suite, Blender, Autodesk 3ds Max, and SketchUp, I produce everything from logos and marketing materials to complex 3D renderings and large-scale displays. Through collaboration with clients, project managers, and vendors, I ensure every project meets the highest quality standards, stays within budget, and is completed on time.

3D Designer, and Signage Estimator in the dynamic advertising industry, I blend creativity with technical expertise to deliver visually captivating and cost-effective solutions. With a deep understanding of design principles, 3D visualization, and signage estimation, I specialize in creating striking brand identities, immersive 3D mockups, and precise signage cost estimates that bring client visions to life.

As a 3D Designer specializing in exterior cladding and façade design, I create innovative and visually striking 3D models of building facades. I collaborate closely with architects, engineers, and clients to ensure that designs meet both aesthetic and functional requirements.

Prepare files for printing and sublimation, ensuring technical specifications are met. Create mockups and prototypes for client approval. Collaborate with the production team to ensure designs are accurately printed. Stay updated on design trends and industry standards.
